Dear Hiring Manager,

I am very excited and grateful for this opportunity to apply for the concerned SDE position at Amazon. I joined AWS in June 2018 as a grad after completing my B. Tech degree in Computer Science Engineering and serving Cloud Support Engineer role for about 2 years now. I have mastered working with numerous AWS services and developed strong understanding of our underlying infrastructure/operations, work ethics and how we at Amazon function in collaboration with diverse teams to deliver our customers with top-notch products.

This is my first job but previously I have worked as an intern with Dell International Services India Pvt. Ltd. where I completed two internship terms - Summer 2017 and Winter 2018. During both the internship terms, I developed and delivered full-fledge Java desktop applications that have helped the organization solve their operational challenges.

I am very honest, disciplined, organized & dedicated towards any deliverables that is assigned to me. With my fundamental understanding of the topic, strong problem-solving capability and creative thinking, I always enjoy working on my projects and put my 110% to make end product the best version of it.

Since my college days, I have keen interest in developing Android, Windows Desktop and Web Applications. My projects involve diverse full-fledge developed apps that have helped me practice, learn and grow as a full stack developer. I find myself extreme passionate about devising ideas and developing robust solutions to any challenge that I come across. I am planning to explore Software development domain and would love to contribute as an individual who has potential to make this world a better place.

I'd like to thank you for taking time to read my cover letter. I hope to speak with you soon and discuss more about this fantastic opportunity to help you validate my skills that make me a good fit for this position.

Thank you :)

Sincerely,
Vishal Singh
